EXAMINER'S AMENDMENT

1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

Authorization for this Examiner's Amendment was given in a telephone interview with Mr. Michael Bentley, Reg. No. 52,613 on March 19, 2007.

2. Cancel claims 8 and 9.
3. Claim 1, line 12, after "clients," insert "and".

Allowable Subject Matter

4. The following is an Examiner's Statement of Reasons for Allowance:

Upon further consideration, in light of Applicants' arguments presented in the appeal brief filed December 20, 2006, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. Poletto et al., US Pat. App. No. 2002/0031134 and Malan et al., US Pat. App. No. 2002/0035698, teach the invention substantially as claimed. The prior art of record teaches a method for thwarting SYN denial of service attacks.

However, the prior art of record fails to teach or suggest individually or in combination a system and method for thwarting coordinated SYN denial of service (CSDos) attacks against a

Art Unit: 2144

server by controlling a network switch to divert or forward all SYN packets destined to said server to a web guard processor. The Examiner finds the applicant's arguments found on page 12, line 7 – page 13, line 5 and page 14, line 27 – page 15, line 8, and page 23, line 6 – page 24, line 5 of the appeal brief filed December 20, 2006 to be persuasive. The applicant argued in substance that the prior art of record does not teach a system and method of controlling a network switch to divert a predetermined fraction of SYN packets destined for said server, to a web guard processor” and “monitoring the number of timed-out connections between said web guard processor and said one or more clients, and, if the number of timed-out connections between said web guard processor and said one or more clients exceeds a first predetermined threshold, controlling said switch to divert all SYN packets destined to said server to said web guard process” wherein the prior art does not teach diverting actual traffic from the routers to the StormDetector's analysis engine, but sends flow statistics to a web guard processor. The applicants further argued that the prior art teaches the gateway forwarding the SYN packet to the server for which the packet is intended, in contrast to forwarding the SYN packets to a TCP proxy as claimed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
